DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13, drawn to the structure of a projection optical system for enlarged projection from a primary image surface existing at a reducing side to a secondary image surface existing at an enlarging side, classified in class 353, subclass 69.

II. Claims 14-20, drawn to the structure of a projection-type image display apparatus that includes modulation means for modulating and outputting light radiated from a light source based on a video signal, classified in class 359, subclass 618.

The inventions are distinct, each from the other because each of the inventions I and II recite limitations not recited in any of the remaining inventions. The differing limitations would appear to make the inventions I and II patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I and II would not by itself anticipate or make obvious the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
